Skills

Programming Languages: C++, Java, JavaScript

Database: SQL, MongoDB

Frameworks: Express.js, Node.js

Experience & Projects

Mini Online Shopping Website - Web Development

Developed a mini-Online Shopping website with essential functionalities:

- User and supplier registration and login system.
- Suppliers can add products to the platform.
- Users can place orders, view their cart, and make replacement requests.
- Admin panel to manage users, suppliers, and requests including order and replacement requests.

Technologies used: Java, HTML, Bootstrap.

Shikshak Recruitment Feb 2024 - Present

The ongoing project is a Faculty Recruitment System developed using EJS (Embedded JavaScript), Express.js, MongoDB, and JWT (JSON Web Tokens) for authentication and authorization. Key features of the system include:

- Recruiter Registration
- Email Verification: Upon registration, recruiters receive an email verification link to confirm their accounts, ensuring authenticity and security.
- JWT Authentication: JSON Web Tokens are utilized for secure authentication, providing a stateless authentication mechanism that allows users to access authorized routes.
- Admin Panel: An admin dashboard is available for administrators to manage recruiters. This includes functionalities such as viewing a list of registered recruiters.

Education

IET DAVV, Indore – B.Tech (Computer Science)

Over all CGPA : 8.88(84.36%)

April 2019 - March 2020

SICA(South Indian Cultural Association Senior Secondary School) - XII (CBSE)
